## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 7, drawn to a method, classified in class 442.
- II. Claims 1-6, drawn to an article, classified in class 428.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article as claimed could be made by another and materially different process one without a contraction step.

During a telephone conversation with Mr. Iaskoff on November 5, 2001 a provisional election was made without traverse to prosecute the invention of Group II, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claim 7 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1772

2. Claim 4 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. A coagulated polymer was not defined and explained in the specification or the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 rejected under 35 U.S.C. 102(b) as being unpatentable by Kourtides et al.

Kourtides discloses a stitch bonded fabric having a pattern of stitches formed by a multi-needle stitched set stitching threads in a material, characterized in that the material comprises of a non-fibrous layer of polymer or metal (col.4 line19) and at least one set of stitching threads comprises a contractible yarn wherein the yarn comprises an elastic filament, a partially oriented synthetic organic polymeric fiber or a textured yarn (col.14 line 40). Kourtides discloses wherein the non-fibrous material layer consists essentially of a polymeric coating and the coating is supported on a fibrous layer (col.8 lines 46-50).
